Education

Columbia University

Master of Arts in Economics

- GPA: 3.8/4.0
- Expected Graduation: Dec. 2026

Sept. 2025 - Present
New York, U.S.

Soochow University, Business School

Bachelor of Economics (minor in Applied Psychology)

- GPA: 3.7/4.0 (major) 3.8/4.0 (minor) | GRE:328
- Honors & Scholarship: Academic Excellence Scholarship (First Prize, 10%, 2023,2024); Innovation and Entrepreneurship Scholarship (First Prize,1%,2023); “Shen Jingsi” Scholarship at Jingwen College (honors college), 2022,2024; *Meritorious Winner*, Interdisciplinary Contest In Modeling(ICM), 2023

Sept. 2021 - June 2025
Suzhou, China

University of California, Berkeley

Visiting Student, Berkeley Global Access Program

- Relevant Coursework: Topics in Economic Research, Algorithmic Economic

Jan. - May 2024
Berkeley, CA, U.S.

Research Projects

Incoming Summer Research Assistant, Columbia University

Research Assistant, Economics Department, supervised by **Prof. Mark Dean**

- Will contribute to the development of an ongoing paper on reference points and value uncertainty, with a focus on both theoretical refinement and experimental design.

Jun. 2026 - Aug. 2026
New York, NY

Letter – Spirit Divergence and Strategic Compliance in Institutional Settings

Research Assistant, Columbia Business School (Morris Lab), supervised by **Prof. Michael Morris**

- Contributed to the development of a coauthored working paper on malicious compliance and strategic rule adherence, focusing on the divergence between the letter and spirit of rules in organizational contexts.
- Contributed to the design and implementation of a chatbot-based negotiation experiment, developing an interactive conversational system to study how negotiation behavior differs when participants unknowingly interact with AI versus human counterparts.

Jan. 2026 - Present
New York, NY

Organizational and Institutional Research Projects

Research Assistant, Columbia Business School, supervised by **Prof. Lori Yue**

- Supported a firm-level research project on nationalism and patriotism, examining how these orientations are expressed in organizational narratives and corporate behavior.
- Conducted literature review, text data collection and coding, and NLP-based semantic analysis of firm communications to identify patterns in discourse and support early-stage research development.

Jan. 2026 - Present
New York, NY

The Reemployment Process and Experience of Older Workers

Researcher

- Designed a structured evidence-review protocol on older worker reemployment, screening 21,987 Web of Science records and refining the final sample to 168 studies using journal-quality and topic-relevance criteria.
- Constructed a bibliometric and thematic mapping framework to characterize the field’s core debates, methodological

Nov. 2024 - Dec. 2025
Suzhou, China

patterns, and open research gaps, and contributed to multiple rounds of revision and resubmission for a coauthored paper currently under review at Academy of Management Annual.

Exploring Psychological Resilience in Work-Family Conflict Among Accompanying Mothers: An NLP-Driven Semi-Structured Interview Study

Nov. 2024 - May 2025

Capstone Project

Suzhou, China

- Conducted semi-structured interviews with 16 mothers to collect primary data on work-family conflict and psychological resilience; utilized SpaCy and Sentence Transformers with Python for data analysis
- Applied VADER and TextBlob to analyze sentiment polarity(positive/negative) and created topic distribution charts

A Study on the Impact of Human-Computer Interaction Features of Smart Wearable Devices on Consumers' Purchase Intentions

May 2023 - May 2025

Project Director (supervised by Prof. Dian Zhu and Prof. Yi Shen)

Suzhou, China

- Conducted a bibliometric analysis of customer preference using CiteSpace
- Designed a discrete choice experiment using SPSS orthogonal analysis and deployed the survey on Credamo for data collection; conducted menu-based choice experiments with a sample size of 380 to analyze trade-offs among HCI features
- Employed a binary logit model with Python and Stata to examine consumer preferences for wearable devices

The Effect of Corporate Behaviors on Employee Performance

Independent Researcher (supervised by Prof. Benjamin R Handel)

Jan. - May 2024

- Used secondary data and multivariate regression analysis to examine the relationship between wage strategies, workplace psychology, and employee attrition.
- Applied the Entropy Weight Method to construct psychological measures and developed a related working paper.

Analysis of the Digital Touchpoints' Influence on Consumer Behavior in the Metaverse

Independent Researcher (supervised by Prof. Aleksei Parakhonyak)

Mar. - Sept. 2023

- Conducted a literature-based study on digital touchpoints and consumer behavior in virtual environments
- Developed a conceptual framework on Millennial consumer behavior and completed a related working paper

Teaching Experience

Teaching Assistant, Intermediate Microeconomics, Columbia University

Spring 2026

Instructor: Prof. Tam Mai

- Led weekly one-hour recitation sessions and one hour of office hours for undergraduate Intermediate Microeconomics
- Graded problem sets and contributed to the preparation of exam materials and review content

Skills

Technical: Python, C++, SPSS, SQL, Stata, MATLAB
